

Implementation Consultant

Recruiter: Vermilion Software Ltd

Location: London, South East England

Sector: IT

Job Type: Permanent

As part of our continued drive to maintain service excellence with our global client base, Vermilion is looking for motivated and skilled **client-reporting software implementation consultant engineers** to join the implementation team and to take lead roles within a rapidly growing and exciting software company.

Candidates should be problem solvers with a strong technical grounding and have an enthusiastic, positive and professional attitude. Candidates should also not be averse to working overseas (US and Europe) when the need arises.

Implementation roles will involve analysing and implementing data extracts, and developing client reports and workflow, using Vermilion software products at customer sites. Tasks will also include the analysis of existing reports, business workflows and systems and their data in order to produce a premium quality result for the client.

We are looking for Candidates with the following skills:

1) Software development

Candidates should have a minimum of 3 years development experience including Analysis, Java & SQL Coding (inc stored procedures), Version Control & Release Management and with working without supervision to tight and unbreakable deadlines. Experience in advanced VBA is also an advantage.

2) Business Experience

Candidates should have a minimum of two years experience in either:

- retail or institutional asset management Back Office environments, ideally in Client Reporting or
- from a software reporting product provider

3) Reporting Solutions

- Experience of painter based reporting solutions in a production environment
- Candidates must have a strong working knowledge of MS Office Word, Excel and PowerPoint.
- Successful candidates will be provided full training to immerse them in the Vermilion products before being introduced to client projects.
