

VERMILION

Implementation Consultant

Recruiter: Vermilion Software Ltd
Location: London, South East England
Salary: £35,000 - £55,000 per annum
Sector: IT & Telecoms - Installation/Rollout Engineer
Job Type: Permanent

As part of our continued drive to maintain service excellence with our global client base, Vermilion is looking for motivated and skilled client reporting implementation engineers to join the implementation team and to take lead roles within a rapidly growing and exciting software company.

Candidates should have an enthusiastic, positive and professional attitude and should not be averse to working overseas (US and Europe) when the need arises.

Implementation roles will involve analysing and implementing data extracts, client reports and workflow, and using Vermilion products at customer sites. Tasks will also include the analysis of existing reports, business workflows and systems and their data in order to produce a premium quality result for the client.

We are looking for Candidates with the following skills:

1) Business Experience

Candidates should have a minimum of two years experience in either:

- retail or institutional asset management Back Office environments, ideally in Client Reporting or
- from a software reporting product provider

2) Reporting Solutions

Experience of painter based reporting solutions in a production environment

3) Java coding

Minimum of 2 years experience in Java developing in a production environment

4) SQL coding

Minimum of 3 years experience with SQLServer, Sybase or Oracle DBMS SQL coding used from within a production reporting environment including good and recent experience with developing stored procedures and data analysis.

5) Software development

Candidates should have a minimum of 3 years project experience including Analysis, Coding, Version Control & Release Management and with working without supervision to tight and unbreakable deadlines.
